For model year 2017, the Volvo XC60 will lose the Premier Trim Level and instead use the names Dynamic Trim Level and Inscription Trim Level. Both of these new trim levels will include more standard features. The Dynamic will offer some sportier elements including Sport Seats (Front), Front & Rear Styling Kit, Black Mirror Caps while the Inscription will include Linear Walnut Wood Inlays, Auto Dimming Exterior Mirrors and Accent Lighting and Comfort Seats (Front).

Volvo has always led the way in innovation, with products that continue to influence and shape the entire car industry. But that’s never been our motivation. You are. Every car, and every world first we introduce, is designed around you… to keep you safer on the road and more at ease behind the wheel. To bring extra excitement to every journey and improve your whole driving experience.

Your lifestyle says you need an SUV; your heart says you want a stylish, driver-focused road car. If this is your dilemma, we’ve designed the Volvo XC60 as your solution. Thanks to its class-leading chassis and Corner Traction Control, a system that makes cornering even more fun, it does not feel like a towering, top heavy SUV; it is every bit as nimble and agile as a ground-hugging road car. But its ride height gives you a commanding driving position and added confidence when negotiating busy city traffic. And with its generous ground clearance, it'll take you wherever your adventurous spirit leads you.
XC60 T5 (Dynamic and Inscription)  MSRP $40,950 + $995 DESTINATION CHARGE

240 hp, 258 lb. ft. torque, Direct-Injected Turbocharged Engine, 8-speed Geartronic Automatic with Start/Stop & Adaptive Shift

CITY SAFETY Included as standard on your Volvo XC60 is CIty Safety, which senses potential collisions (active from 2 to 31 mph) and can activate the brakes automatically should you not react in time. (Video)

LANE DEPARTURE WARNING Cameras constantly monitor the XC60's position on the carriageway, gently warning the driver if roadside markings are crossed without obvious reason such as use of the turn indicator. (Video)

ADAPTIVE CRUISE CONTROL WITH FULL AUTO BRAKE When engaged, adaptive cruise control makes driving the XC60 even more relaxing, using radar to maintain a set distance to the car in front. As soon as a slower vehicle is detected, the car's speed will automatically adapt to match it, keeping you at a safe distance. The useful Queue Assist function (available on vehicles with automatic transmission) can keep the gap even in queues with repeated starting and stopping. (Video)

ROAD SIGN INFORMATION The XC60 can also help you stay informed by displaying road sign information within your instrument display, including speed limit signs and "no overtaking" warnings. (Video)

ACTIVE HIGH BEAM In addition to Active Bending Xenon Lights, which swivel the headlamps to follow the road, you can also specify Active High Beam - enabling the car itself to switch between high and low beam when on-coming traffic approaches. (Video)

VOLVO ON CALL This GPS communication system helps you stay connected to your car, helping you locate your vehicle, lock and unlock it, and even see all your dashboard readings (fuel levels, trip meter, etc.) - all from your smartphone or mobile device. Plus, it means emergency assistance is available at the touch of a button. (Video)

PEDESTRIAN AND CYCLIST DETECTION The groundbreaking Pedestrian and Cyclist Detection technology with full auto brake, detects and automatically brakes for cyclists swerving out in front of the car. The advanced sensor system scans the area ahead. If a cyclist heading in the same direction as the car suddenly swerves out in front of the car, as it approaches from behind, it will prompt you to act with a flashing warning light on the windscreen, along with an audible alarm. If you do not react to the warning, and a collision is imminent, the car immediately brakes with full braking force. (Video)

BLIND SPOT INFORMATION SYSTEM (Video) WITH CROSS TRAFFIC ALERT (Video) The radar based BLIS technology informs the driver about other vehicles in the blind spots on both sides of the car and also monitors and alerts drivers to rapidly approaching vehicles up to 70 metres behind the car. Cross Traffic Alert uses the radar sensors at the rear end of the vehicle to alert the driver to crossing traffic from the sides when reversing out of a parking space.

VOLVO SENSUS CONNECT With the launch of Sensus Connect, Volvo Cars reveals an updated on-board infotainment and navigation solutions. Now, Volvo Cars truly offers customers a fully connected experience. The cloud-based services allow the driver to find and pay for parking from their car, discover new restaurants at their destination, stream their favorite music seamlessly and much more. (Video)
Some of the information in this price list may not have been updated due to product changes which may have occurred since it was printed. Some of the equipment described or shown may now be available only at extra cost. Before ordering, please ask your Volvo dealer for the latest information. The manufacturer reserves the right to make changes at any time, without notice, to prices, color, materials, specifications and models.
